## NiAD Blood Based Collection Schedule for DS Participants:

<table>
<thead>
<tr>
<th></th>
<th>Baseline</th>
<th>16-Month</th>
<th>32-Month</th>
<th>48-Month</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Serum</strong></td>
<td>X</td>
<td>X</td>
<td>X</td>
<td>**</td>
</tr>
<tr>
<td><strong>DNA</strong></td>
<td>X</td>
<td>X*</td>
<td>X</td>
<td>**</td>
</tr>
<tr>
<td><strong>Plasma</strong></td>
<td>X</td>
<td>X</td>
<td>X</td>
<td>**</td>
</tr>
<tr>
<td><strong>Karyotyping</strong></td>
<td>X</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

* DNA from the 16-Month Visit (University of Pittsburgh ONLY) will not be shipped to NCRAD, but maintained at the site.

** No Blood based biomarkers are collected at the 48-month visit.
NiAD Blood Based Collection Schedule for Sibling Controls:

<table>
<thead>
<tr>
<th></th>
<th>Baseline</th>
<th>16-Month</th>
<th>32-Month</th>
<th>48-Month</th>
</tr>
</thead>
<tbody>
<tr>
<td>DNA</td>
<td>X</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Plasma</td>
<td>X</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

* Blood is only collected at the baseline visit for sibling controls.
Kit Request Module

http://kits.iu.edu/adds-niad
Kit Request Module

• An initial stock of kits will be delivered prior to the designated site specific start date.

• Kits and individual supplies are available to order:
  • NiAD DS Participant Blood Kit
  • NiAD Sibling Control Blood Kit
  • NiAD Frozen Shipping Supply Kit
  • Blood Supplemental Kit
  • CSF Supplemental Supply Kit
  • Lumbar Puncture Trays
  • CSF Shipping Supply Kit
NCRAD Kit Request Module

1. Choose your site from the drop down list
2. The coordinator name and contact information will appear
3. Verify that this information is accurate, correct if necessary
## ADDS and NiAD Kits Available

<table>
<thead>
<tr>

</table>

### Do you need Extra Supplies?

- Yes
- No

**Note:** Must provide value

### Comments

![Comment box]

[Submit Button]
### Study Visit Kits

- Indicate the quantity needed of each kit
- Once selected, kit components of the chosen kit will appear at the bottom of the screen (Pictured)
- Click “Submit” to turn in your request.
- The IU staff will notify you that your request has been received and address any issues.
- **Note: You can order more than one type of kit in a single kit request**

<table>
<thead>

**Do you need Extra Supplies?**
- Yes
- No

**Comments**

Each NIAD DS Participant Blood Kit Contains:
1. EDTA (Lavender-Top) Blood Collection Tube (10 ml)
2. Serum Separator (Gold Top) Blood Collection Tube (5 ml)
24: Siliconized cryovial tube (0.5 ml) with lavender sticker
27: Siliconized cryovial tube (0.5 ml) with red sticker
15: 15 ml conical
14: Cryovial tube (2.0) with blue cap
13: Disposable graduated transfer pipette
46: Pre-printed Collection and Aliquot Tube Label
3: Pre-printed Kit Number Label
4: Labels for handwritten Site and NIAD ID
2: Microcentrifuge tube box (holds up to 25 microcentrifuge tubes)
Each site will be responsible for ordering kits (labels included) and maintaining supplies on site for scheduled participants.

To order, sites will use the Indiana University online kit ordering module: [http://kits.iu.edu/adds-niad](http://kits.iu.edu/adds-niad)

Allow a minimum of **2 weeks** for your order to be processed and delivered.
Specimen Labels
Label Type Summary

1. Kit Number Labels
2. Site and NIAD ID Labels
3. Collection and Aliquot Tube Labels
   • Differ by specimen type
Kit Number Labels

• Used to track patient samples and provide quality assurance
• Will be placed on the following locations:
  1. Biological Sample and Shipment Notification Form
  2. Outside cryobox that houses aliquot tubes during storage and shipment

Provided by NCRAD in the kits
Site and NIAD ID Label

- Subjects will be identified by their site ID and NIAD ID
- The NIAD ID may only be available shortly before the visit
- Sites will be responsible for handwriting this onto the provided labels
  - Must use fine point permanent marker
  - Each site will receive 4 markers in initial kit supply
Site and NIAD ID Label Cont.

- Write information on label prior to adhering to tube
- Label will be placed on all collection tubes
  - (2) Serum Separator (Gold-Top) Blood Collection Tube (5 ml)
  - EDTA (Lavender-Top) Blood Collection Tube (10 ml)
- Kits will include one extra label
Collection and Aliquot Tube Labels

Specimen Number (assigned by NCRAD)

Repository Name

Sample Type

Kit # (assigned by NCRAD) unique to the subject and visit
Collection and Aliquot Tube Labels - Blood

- Labels to be placed on ALL collection and aliquot tubes

1. Serum Separator (Gold-Top) Blood Collection Tube (x2)
   - Serum aliquots

2. EDTA (Lavender-Top) Blood Collection Tube (x1)
   - Plasma aliquots
   - Buffy coat aliquot
Collection Tubes – Blood

- Serum Separator (Gold-Top) Blood Collection Tube (5 ml)
- EDTA (Lavender-Top) Blood Collection Tube (10 ml)

*Collection/Aliquot tube label*
*place barcode near top*

*Site and Subject ID label*

*Drawn for DS Participants ONLY*

*Drawn for DS Participants and Sibling Controls*
Collection Tubes - Blood

Label 1: Collection Tube Label

- 0000200128 NiAD PLASMA Kit #: 250001
- 0000200129 NiAD SERUM Kit #: 250001

EDTA Tube Serum Separator Tubes

Label 2: Site and NIAD ID Label

- Site: 
- NIAD: 

• All collection tubes will have two labels
  • The Collection Tube Labels
  • The handwritten Site and NIAD ID Label
Aliquot Tube Labels – Serum, Plasma and Buffy Coat

- Collection and Aliquot tube label only
- Please place barcode near cap
Handling/Processing Study Specimens
# Site Required Equipment

<table>
<thead>
<tr>
<th>Blood Collection/Safety Equipment</th>
<th>Processing/Storage Equipment</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. PPE</td>
<td>1. Centrifuge capable of ≥2000 rcf with refrigeration to 4°C</td>
</tr>
<tr>

</tr>
</tbody>
</table>
***Important Note***
In order to ensure the highest quality samples are collected, processed, and stored, it is essential to follow the specific collection, processing, and shipment procedures detailed in the following pages. Please read the following instructions first before collecting any specimens. Have all your supplies and equipment out and prepared prior to drawing blood. Draw blood in the following order:

1. Serum Separator (Gold-Top) Blood Collection Tube (5 ml) for Serum x 2 (DS Participants ONLY)
2. EDTA (Lavender-Top) Blood Collection Tube (10 ml) for DNA and Plasma (DS Participants AND Sibling Controls)
3. Sodium Heparin (Green-Top) Blood Collection Tube (10 ml) for Karyotyping (Baseline ONLY for DS Participants ONLY)

# Aliquot Cap Colors

<table>
<thead>
<tr>
<th>Cap Color</th>
<th>Sample Type</th>
</tr>
</thead>
</table>
| Clear Cap with Lavender Sticker | Plasma and Plasma Residual (<0.25 ml)  
(Document Specimen Number and Volume of Residual Aliquot on Sample Form) |
| Clear Cap with Red Sticker    | Serum and Serum Residual (<0.25 ml)  
(Document Specimen Number and Volume of Residual Aliquot on Sample Form) |
| Blue                         | Buffy Coat                                                                                                                                   |
Serum Preparation (5 ml Gold-Top Tube)

Step One
- Store tubes at room temperature.
- Label tubes with preprinted labels prior to blood draw.

Step Two
- Collect blood in (2) 5 mL Gold-Top tubes allowing blood to flow for 10 seconds and ensure blood flow has stopped.

Step Three
- Immediately after blood draw, invert tube 5 times to mix samples.

Step Four
- Allow blood to clot for 30 minutes.
- Within 60 minutes of blood draw, centrifuge samples at 2000 x g at 4°C for 10 minutes
- Using a clean transfer pipette, transfer Serum from both 5 mL Gold-Top tubes to the 15 mL conical tube.

Step Five
- Mix the 15 mL conical tube gently by inverting 3-4 times.
- Using a clean transfer pipette, transfer Serum from both 5 mL Gold-Top tubes to the 15 mL conical tube.

Step Six
- Adhere preprinted labels to the clear cap cryovials with red stickers
- Aliquot 0.25 ml into each cryovial tube.
- If a residual aliquot is created, document specimen number and volume on Sample Notification Form.
- Store serum aliquots at -80°C until shipment.
Serum Separator Tube (Serum Collection)

*Drawn for DS Participants ONLY

Create 16 to 21 aliquots of 0.25ml; if residual aliquot created, document specimen number and volume on sample form
Plasma and Buffy Coat Preparation (10ml Lavender-Top Tube)

**Step One**
- Store tubes at room temperature.
- Label tubes with preprinted labels prior to blood draw.

**Step Two**
- Collect blood in Plasma Tube allowing blood to flow for 10 seconds and ensuring blood flow has stopped.

**Step Three**
- Immediately after blood draw, invert tube 5 times to mix samples.

**Step Four**
- Place thoroughly mixed tube on wet ice until centrifugation begins.

**Step Five**
- Preferably within 30 minutes of blood draw, centrifuge samples at 2000 x g at 4°C for 10 minutes.
- Samples need to be spun, aliquoted, and in the freezer within 2 hours from the time of collection.

**Step Six**
- Adhere preprinted labels to the clear cap cryovials with lavender stickers.
- Aliquot 0.25 ml into each cryovial tube.
- If a residual aliquot is created, document specimen number and volume on Sample Notification Form.
- Store plasma aliquots at -80°C until shipment.

**Step Seven**
- Adhere preprinted labels to the blue cap cryovial.
- Using a clean pipette tip, collect the buffy coat (may have residual plasma and some RBCs included).
- Transfer the buffy coat into the cryovial tube.
- Store buffy coat aliquot at -80°C until shipment.
Create 16 to 21 aliquots of 0.25ml; if residual aliquot created, document specimen number and volume on sample form.
EDTA Tube (Buffy Coat Collection)

Important Note:
- Buffy Coat aliquots will be distinguished from the plasma aliquots through a blue cap.

*Drawn for DS Participants and Sibling Controls
Sodium Heparin Tube (Karyotype)

• Drawn at baseline ONLY
• Tube does NOT get sent to NCRAD
• Used to obtain karyotype for full or partial trisomy 21 by the local clinical lab.
• Check with local lab for the amount of blood needed, storage, and transport conditions

*Drawn for DS Participants ONLY at Baseline ONLY*
Sample Shipping
# Blood Sample Shipment Summary

<table>
<thead>
<tr>
<th>Sample Type</th>
<th>NiAD</th>
<th>Processing/ Aliquoting</th>
<th>Tubes to NCRAD</th>
<th>Ship</th>
</tr>
</thead>
<tbody>
<tr>
<td>Whole blood (Gold-Top SST) for isolation of serum</td>
<td>Yes</td>
<td>0.25 ml serum aliquots per 0.5 ml siliconized cryovial (clear caps with RED stickers)</td>
<td>16-21</td>
<td>Frozen</td>
</tr>
<tr>
<td>Drawn for DS Participants ONLY</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Whole blood (Lavender-Top EDTA) for isolation of plasma &amp; buffy coat (for DNA extraction)</td>
<td>Yes</td>
<td>0.25 ml plasma aliquots per 0.5 ml siliconized cryovial (clear caps with LAVENDER stickers)</td>
<td>16-21</td>
<td>Frozen</td>
</tr>
<tr>
<td>Drawn for DS Participants and Sibling Controls</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>1 ml buffy coat aliquot per 2.0 ml cryovial (BLUE cap)</td>
<td>Yes</td>
<td></td>
<td>1</td>
<td>Frozen</td>
</tr>
</tbody>
</table>
Frozen Sample Shipping

• **Ship Monday-Wednesday Only**
  • Serum, Plasma and Buffy Coat
  • Hold packaged samples in a -80°C freezer until pickup.
• Batch Samples together
  • 10 cryoboxes
  • Batch shipping should be performed quarterly or as a full shipment of specimens accumulates, *whichever is sooner*. 
Frozen Shipping - Cryoboxes

Place kit number label on top of cryobox

One cryobox to contain Serum aliquots, one per subject.

One cryobox to contain Plasma and Buffy Coat aliquots, one per subject.

Place both cryoboxes into one Biohazard Bag.
Shipping Frozen Samples

• Schedule FedEx or UPS (US and UK)
  • Please note: international shipments require completed International Commercial Invoice, Declaration of Goods Document, and International Fed Ex Airbills

• Send Biological Sample and Shipment Notification Form to IU (US) **ahead of shipment**
  • **Email:** alzstudy@iu.edu or
  • **Fax:** 317-321-2003
Frozen Shipping – Dry Ice Requirements

• Fully cover the cryoboxes with about 2 inches of dry ice in the provided shipper.

• Each Styrofoam shipper must contain about 45 lbs (20 kg) of dry ice.
Frozen Shipping – Dry Ice Requirements

Class 9 Dry Ice label should not be covered with other stickers and must be completed or the shipping carrier will reject/return your package!

Net weight of dry ice in kg

Your name & address

Repository name & address

Airwaybills / airbills must have the following:
1. Dry ice; 9; UN 1845
2. \( \frac{\text{Number \ (lbs)}}{\text{Kg}} \times \text{Kg} \)
Frozen Shipping - Fedex Airbill

Airbill must be completed or the shipping carrier will reject/return your package!
Frozen Shipping - Fedex Airbill – International

Your name, address & phone

FedEx Account Number

Net weight of dry ice in kg

Dangerous goods info (for dry ice shipments only)
Biological Sample and Shipment Notification Forms

• A copy of the sample form *must* be emailed or faxed to NCRAD prior to the date of sample arrival.

• Please include sample forms in all shipments of frozen and ambient samples.

• Email: alzstudy@iu.edu

• Fax: 317-321-2003

**What to do for Friday Blood Draws**

NCRAD is not open for business on Saturday or Sunday; therefore, we ask that no samples be shipped on a Friday. We cannot guarantee the conditions in which the samples will be held by the shipping courier over the weekend. It is important to have plans in place for each type of sample to be held over the weekend prior to shipping. Please refer to the table below for how to handle samples drawn on a Friday.

When possible, please only ship frozen samples on Monday-Wednesday. There is always the potential for an unexpected shipping courier delay and by shipping Monday through Wednesday there should be enough time to receive the samples before the weekend.

<table>
<thead>
<tr>
<th>Sample Type</th>
<th>Tube Type</th>
<th>Product</th>
<th>Shipment Method</th>
<th>Friday Draw Instructions</th>
</tr>
</thead>
<tbody>
<tr>
<td>Whole Blood</td>
<td>Sodium Heparin</td>
